Sir:

Prior to examination, please further amend as follows the above-identified patent application which is a divisional of Application Serial No. 07/640,337 filed on January 11, 1991:

IN THE CLAIMS:

Please amend Claims 62 and 71.

- 1 sub E 4 62. (Amended) An analysis control system for use
2 with a communication facility including remote terminals for
3 individual callers, wherein each of said remote terminals may
4 comprise a conventional telephone instrument including voice

D1
(cont'd)

07/803,269-120301

5 communication means and digital input means in the form of an
6 array of alphabetic numeric buttons for providing data and
7 wherein said communication facility has a capability (ANI) to
8 provide terminal digital data, for example, indicating the
9 calling number, said analysis control system comprising:

10 interface structure coupled to said communication
11 facility to interface each of said remote terminals for voice
12 and digital communication, and including means to provide
13 signals representative of data developed by said remote
14 terminals and said terminal digital data indicative of the
15 calling number using said capability (ANI);

16 voice generator structure coupled through said
17 interface structure for actuating said remote terminals as to
18 provide vocal operation instructions to said individual
19 callers;

20 record structure, including memory and control
21 means, connected to said interface structure for initiating a
22 file and storing data relating to certain select ones of said
23 individual callers in accordance with said terminal digital
24 data;

25 qualification structure controlled by said record
26 structure for restricting the extent of access to said system
27 by said individual callers; and

28 designation structure coupled to said interface
29 structure and said record structure for assigning individual
30 designations to said individual callers and storing said

31 ~~designations in said record structure.~~

Sub
E8

1 71. (Amended) An analysis control system for use
2 with a communication facility including remote terminals for
3 individual callers, wherein each of said remote terminals may
4 comprise a conventional telephone instrument including voice
5 communication means and digital input means in the form of an
6 array of alphabetic numeric buttons for providing data and
7 wherein said communication facility has a capability (ANI) to
8 provide terminal digital data, for example, indicating the
9 calling number, said analysis control system comprising:
10 interface structure coupled to said communication
11 facility to interface said remote terminals for voice and
12 digital communication and including means to provide caller
13 data signals representative of data relating to said
14 individual callers developed by said remote terminals and said
15 terminal digital data indicative of the calling number using
16 said capability (ANI);
17 analysis structure for processing said caller data
18 signals;
19 structure for controlling said analysis structure in
20 accordance with said terminal digital data; and
21 qualification structure to test caller data signals
22 specifying a consumable participation key as provided from
23 said remote terminals.

160021-09220870

REMARKS

Claims 62 and 71 have been revised to define a further limitation. Applicant respectfully requests examination and allowance of Claims 29-73.

Respectfully submitted,
NILSSON, WURST & GREEN
